

Environmental Management

Ecological Expertise & Strong Relationships Within The Regulatory Community

Florence & Hutcheson is a leading provider of professional environmental management consulting and turn-key execution for environmental projects. F&H has a team of highly skilled and experienced engineers, scientists, planners and designers.

Along with our transportation expertise, we have wide-ranging capabilities that enable us to integrate environmental, social, technical, operational and financial factors in a project delivery framework that anticipates and meets the regulatory requirements of the National Environmental Policy Act (NEPA), Section 404 of the Clean Water Act (CWA) and applicable state environmental regulations.

We routinely provide environmental services associated with compliance of local, state and federal permitting required for the protection of aquatic resources including wetlands, rivers, lakes, and streams. We also provide permitting services for projects that require erosion prevention and sediment controls under the National Pollutant Discharge Elimination System (NPDES) permit program. We also have certified erosion prevention and sediment control inspectors to assist with environmental compliance for construction projects.

Our services include:

- Environmental Planning
- NEPA Documentation
- Permitting
- Erosion Prevention & Sediment Control Inspections
- Environmental Commitments/Compliance Monitoring
- Coastal Zone Studies
- Wetlands
- Ecological Studies
- Essential Fish Habitat Assessments
- Environmental Assessments
- Air Quality Assessments
- Water Quality Assessments
- Mitigation Planning
- Public Involvement Process

You can trust **F&H** to provide innovative, on-time and cost effective design, development, planning and environmental compliance while meeting regulatory requirements and maintaining community vision.
